Subject: Technical expertise on upper cement creek area

Shaun

We wanted to forward along this attached correspondence from a constituent to you and your team. This is a constituent we have spent some time visiting with regarding his ideas on the upper cement creek situation. He seems to have extensive technical expertise in the upper Cement Creek drainage that could perhaps be of assistance to EPA as it continues to work in that area. He managed the Sunnyside mine works in the 1980s both below and above the Gold King so he is quite familiar with the tunnels, fractures and hydrology of the mountain.
